### **DETAILED ACTION**

This is the First Office Action in response to the above identified patent application filed on January 12, 2004.

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 3 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The limitation "...traction oil ejected from said nozzle holes is sprayed only onto said discs, at positions circumferentially spaced from positions at which said inner surfaces contact with said peripheral surfaces of said power rollers" is new matter because the original disclosure does not disclose the claimed feature. It is acknowledged that the holes are arranged to spray oil on the discs at positions circumferentially spaced from positions at which said inner surfaces contact with said peripheral surfaces of said power rollers, however the disclosure does not teach "traction oil ejected from said nozzle holes is sprayed only onto said discs." Referring to Figure 4, it is understood the traction oil is sprayed onto the portion of the discs as

illustrated by the cross-hatching, but the disclosure does not clearly teach the above described limitation. Accordingly, applicant must remove this limitation from the claim or identify the portion of the disclosure which supports this limitation.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 3 and 4 are rejected under the judicially created doctrine of double patenting over claims 2 and 9 of U. S. Patent No. 6,682,457 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: nozzles holes for spraying traction oil onto the discs.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of

the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

***Allowable Subject Matter***

5. Claim 4 would be allowable if applicant overcomes the double patenting rejection set forth in this Office action.
